## Spring Has Sprung!

Now is a great time to take small steps to make your business more energy efficient. Not only does saving energy benefit the planet, but it could also help your business save on maintenance costs.

Check out these simple ways to make your building more efficient and show your

commitment to sustainability:

- Turn off unneeded lights and open blinds to harness natural lighting.
- Unplug equipment like computers and printers when not in use.
- Check for and seal gaps and cracks around windows and doors.

These activities help manage your business's energy bills and reduce your building's environmental impact.

Ready to take the next step? Xcel Energy offers rebates for installing energy-efficient equipment and lighting.
